

Considerations for the Use of Telemedicine in the Treatment of Patients with Fabry Disease

Eric Wallace, MD

Medical Director of UAB eMedicine
University of Alabama at Birmingham

Learning Objectives

- Underscore the need for telemedicine in rare-disease patient care
- Share successes and learnings related to the implementation of telemedicine as part of the care model
 - Regulatory, reimbursement, systems
 - Troubleshooting disparities in providing care via telemedicine
- Share practical experience in utilizing telemedicine to care for patients living with Fabry
- Suggest a model for evolving Fabry patient care

Overview

- Platforms and Technology
- Workflow
- Regulatory
- Insurance
- Physical Exam
- Labs and Coordination

Telehealth Opportunities in Rare Disease

- Continuation of care and possible quality of life improvement for our patients
- Development of centers of excellence for rare diseases
- Ability to reach patients who never could be reached previously
- Opportunity to counsel family members
